

PAYPLUS.net[©]

PAYPLUS.net - The complete PAYROLL Management Software.

- PAYPLUS cater to the most complex payroll requirements. Even if you have employees who are paid at different times and intervals, or have different working days or hours for various departments.
- PAYPLUS will meet your complex needs.
- PAYPLUS allows you to calculate all payments -- even if they are computed by complex formulae.
- PAYPLUS keeps track of absenteeism and leaves, and saves you a lot of time every month. In short
- PAYPLUS can be configured the way you want it.

No Customisation Required

PAYPLUS can adapt to any business segment, be it a manufacturing unit, hotel industry, service/software companies or trading companies for that matter. PAYPLUS can handle Hourly, Daily, Weekly and Monthly paid employees.

Minimum User Entry

In cases of employee attendance, you just need to enter the absenteeism of an employee, the rest is taken care of by PAYPLUS. Even for allowances and deductions, you only need to enter values for fields which are recurring in nature.

Easy and Powerful Formula Builder

PAYPLUS has a very useful option of the formula builder which lets you define formulas for any sort of calculation. It is as easy as defining formula in a spread sheet. Additionally, you can also mention any special conditions based on which the calculations are to be done.

Leave Calculations

You just need to enter the dates on which an employee has availed leave and the types of leave availed. Based on the rules defined in the masters while setting up PAYPLUS, reports would be generated.

Complete Employee Information

PAYPLUS stores the complete employee records.

Most Powerful and Flexible Report Writer

When you work on PAYPLUS, you have access to the most flexible Report Writer. This feature dares you to be creative in designing various reports, in whatever format. You can also design multiple designs for a single report plus there is no limitation to the number of reports that can be designed.

PAYPLUS integrates with EXACTLLY Realtime Accounting Software

You do not have to re-enter the payroll entries into your accounts package anymore, if you use EXACTLLY Realtime Accounting Software. PAYPLUS integrates seamlessly with EXACTLLY and posts all payroll entries, including deductions, CPF payable, division code, document code etc automatically. No additional entry to be made at all. If you roll back the payroll generation, the posting from EXACTLLY is also automatically rolled back.

Future Proof

PAYPLUS employs the powerful Template Technology developed by us, to give you the power to implement even future changes to your payroll structure without even talking to us. Even if the tax requirements change in your country, you can incorporate these into PAYPLUS yourself and that too at any point of time.
